Culpepper Revived.

BEING AN ALMANACK

for the Year of our

BLESSED SAVIOURS

Incarnation 1684.

And from the Creation of the World according to the best of Eccleſiaſtical Hiſtory 5633.

Being the Biſſextile or Leap-year.

Wherein is briefly ſhewed, the general State of the Year, the Solar ingreſſes, Eclipſes, Full Sea at *London* Bridge, Terms and their returns, the Sun and Moons riſing and ſetting, with Aſtrological Obſervations, and the probable alteration of the air.

Alſo the certain time of any Mart or Fair in any City or Town in *England*, with a deſcription of the moſt eminent Roads therein.

To which is added Rules for Phyſick and Husbandry with many other uſefull Obſervations neceſſary for the compleating ſuch a work.

Calculated and referr'd to the Meridian of the famous Univerſity and Town of *Cambridge*; where the Pole Arctick is elevated above the Horizon 52ᵈ 17ᵐ but may ſerve for any other part of Great *Britain*.

By *Nathaniel Culpepper* Student in Phyſick, and the Cœleſtial Science.

Nil difficilius quam de futuris veritatem prædicere.

CAMBRIDGE,

Printed by *John Hayes*, Printer to the Univerſity. 1684.

The *Julian* or old Account used in *England*.	1684.	The *Gregor.* or New Stile used beyond Sea

23	The Epact.	13
Feb. 10	Shrove Sunday	Feb. 13
March 30	Easter day	April 2
May 18	Whit-sunday	May 21
Nov. 30	Advent Sunday	Decemb. 3

A Table of the four Terms and their Returns.

Hillary Term	Begins Jan. 23.	Octab. Hill. Jan. 31.
	hath 4 Returns.	Quind. Hill. Jan. 31.
		Craft. Purif. Feb. 4.
	Ends Febr. 12.	Octab. Purif. Feb. 11.
Easter Term	Begins April 16.	Quind. Pasch. Apr. 14.
		Tres Pasch. Apr. 21.
	hath 5 Returns.	Mens. Pasch. Apr. 28.
		Quinq; Pasch. May 5.
	Ends May 12.	Craft. Ascen. May 9.
Trinity Term	Begins May 30.	Craft. Trinit. May 26.
	hath 4 Returns.	Octab. Trin. June 1.
		Quind. Trin. June 9.
	Ends June 18.	Tres Trin. June 16.
Michael. Term	Begins Octob. 23.	Tres Mich. Octob. 20.
		Mens. Mich. Octob. 27.
	hath 6 Returns.	Craft. Anim. Nov. 3.
		Craft. Mart. Nov. 12.
		Octab. Mart. Nov. 19.
	Ends Novem. 28.	Quind. Mart. Nov. 26.

The Terms commence, conclude; and yet the *strife*
Ends not: *contention* hath a tedious *life*:
And (which is worse) who e're the *Conquest* get,
Gains but a lump of drowsie *after-wit*.
But ô revenge! (he'll chat, although he begs)
'Tis *sweeter far*, than *Muscadine* and Eggs. *G. W.*

The Regal Table.

Six *Edwards*, *Richards* three, and one Queen *Mary*,
Elizabeth & *James*, two *Charles's*, the number's even 26
(Though odly often, Times and Seaſons vary.)
Now may they Live and Die accurs'd of God,
That traiterouſly do wiſh the Number odd.

New moon the 6 day, half an hour past 5 at night.
First quarter 14 days, near half an hour past 6 at night.
Full moon the 22 day, about 8 in the morning.
Last quarter the 28 day, 3 quarters past 9 at night.

1	a	New years	secret	10	M	14	1	M	54	If God be for us who can be against us? The Trine of the Sun and Jupiter attended with the hatefull Opposition of Saturn & Mars, as also the subtil Quadrature of Joue & Mercury, shews very notable Transactions now on foot both at home and abroad. The greatest Wits are now at work, & the most eminent Grandees of some adjacent Kingdoms and Countries are at this time notably active——Some receive Advancement, others are Discarded: and thus we see our joys in this World do not always run smooth & clear, and the sweetest cup hath some lees at bottom.

'Tis generally owned that inferiour bodies are rul'd & govern'd by superiours, & still we find that our Times and Persons alter, but Vices are the same and ever will be; Now I may well put the Question, is not this *Mundus Furiosus?* Here's *Democritus* laughing, *Heraclitus* weeping, every man abounds in his own sense, and our Censures are as various as our Palats, but this Month things begin to appear with a moderate good prospect, may they long continue so!

The Active Martialist begins to look about him, and if I mistake not, 'tis high time, but post *tenebras spero lucem.*

May hath xxxi days.

Power and Majesty can brook no equals, & we also know that the Sheep are in continual fear when the Wolf is near.

We hear of very notable debates in the Grand Councils of the most eminent Kingdoms of *Europe*, for at this juncture of time very great things are expected to be transacted.

This seems a busie Month in earnest, & matters no less weighty than considerable are vigorously and briskly controverted, by some of the wisest heads of ours & our neighbour Nations. *Sed nemo particularia predicit.*

New moon the 3 day, 3 quarters past 2 in the morn.
First quarter the 10 day, 3 quarters past 9 in the morn.
Full moon the 17 day, half an hour past 2 in the morn.
Last quarter the 24 day, a quarter past 5 afternoon.

Vis unita fortior.
Most parts of the European world begin to apprehend mischief & confusion approaching, & by this time we may be too sensible of the Effects of the late famous Conjunctions & Comets, so much derided by some of the Wits of the World, I dare not be so particular as I could be, & as some (for the information of young Artists) lately have been, nor do I think it prudence in any man to make himself too ridiculous and run into eminent danger thereby to be taken notice of in the world.

July hath xxxi days.

New moon the 2 day, half an hour past 2 afternoon.
First quarter the 9 day, half an hour past 1 afternoon.
Full moon the 16 day, half an hour past noon.
Last quarter the 24 day, 3 quarters past 9 in the morn.

31	b	thunder.	heart	2		36	3	5

'Tis too often seen that in some persons even Plenty it self crosses the content; & tho they have all things to their minds yet they want minds to enjoy what they have. We are yet in moderate good order could we but tell when we are well, indeed some sickness may now be expected but I hope not so violent as we have cause to fear. Intelligence of good consequence arrives this Month to our English Merchants, and letters such busie agents that secretly indeavour to poyson the minds of the People beware, for Providence will most certainly discover their wicked indeavours.

Luter Anguis in herba.

August hath xxxi days.

New moon the 1 day, a quarter past 2 in the morn.
First quarter the 7 day, half an hour past 7 afternoon.
Full moon the 15 day, a little past 1 in the morning.
Last quarter the 23 day, near a quarter past 3 morn.
New moon the 30 day, half an hour past 10 morn.

4	B	of this month	reins	6	8	9	2		Let us indeavour to clear the Glass that we may let in a more plentifull light.—This Month begins with very faire & pleasing pretentions, and I wish they may prove so: the Configurations are not very material, yet we have no other cause but to hope for a general unity amongst our selves, or at least a strong inclination thereunto. Now we may expect the effects of some late Counsels and Consultations, all tending to the regulation of present disorders. God preserve the whole Nation, & in particular our Metropolis, from Sickness, Fire, &c.

Let us indeavor to propagate verity in Charity, in which 'tis said there is no excess.

This Months Actions in general should prove calm enough, & let us not repine at those things which cannot be either prevented or amended.

'Tis probable there may be a famous match of two Eminent Persons in our Nation now or near this time.—Much News arrives about the end hereof, and advancement is conferr'd upon a very Honourable and deserving Person or two, amongst us, and *Englands* Grandeur stands firm, may it ever continue so.

First quarter the 3 day, near 6 afternoon.
Full moon the 11 day, half an hour past 10 at night.
Last quarter the 19 day, 3 quarters past 10 in the morn.
New moon the 26 day, 3 quarters past 2 in the morn.

1	f	As the last	leggs	7	A 34	9	A 14	
2	g	Month ended	feet	8	20	10	24	'Twas well said of one, That he that believes a thing because it may be true, may as well doubt of it because it may be otherwise, & therefore to say there is not use to be made of the stars, because God has not commanded it: is very ridiculous. This Month produces many varieties in mundane affairs, Many are weary of their fruitless expectations and consequently much discomposed & troubled. More than ordinary matters now controverted, and we do yet continue in peace amongst our selves, notwithstanding the indeavours of some to draw us unto confusion.

First, to Honiter 12, Chard 10, Crookhorn 6, Sherburn 10, Shaftsbury 12, Salisbury 13, Andover 15, Basing-stoke 16, Hartlerow 8, Bagshot 8, Stanes 8, London 15.

From Exeter *to* Barnstable 25 *miles.*

First, to Copstonstone 3, Colerige 8, Highbrickington 8, Barnstable 6.

From [illegible] *to* Bristol 52 *miles.*

First, to Colhalt[illegible] Wellington 8, Cumberm 5, Bridgwater 7, Glastenbury [illegible], Bristol 5.

From Lincoln *to* London 99 *miles.*

First, to Sleeford 14, Bonn 23, Westdeeping 5, Gunworth-ferry 5, Stilton 4, and so to London as in Barwick way.

From Ludlow *to* Worcester, *and so to* London 106 *miles.*

First, to Tenbuy 6, Worcester 16, Evisham 11, Chipping-norton 14, Islip 12, Wickam 20, Beaconsfield 5, Uxbridge 7, London 15.

From Norwich *to* London 95 *miles.*

First, to Windham 5, Attleburrow 10, Thetford 10, Icklingham-sands 9, New-market 10, Whitford-bridge 10, Barkway 10, Puckeridge 7, Ware 5, Waltham 8, London 12.

From Nottingham *to* London 91 *miles.*

First, to Loughborough 8, Leicester 8, Harborough 11, Northampton 12, Stonystratford 10, and so to London as in Cockermouth and Lancaster way.

From

From Norwich *to* Yarmouth 16 *miles.*

First to Okehil 8, thence to Yarmouth 8.

From Oxford *to* London 47 *miles.*

First to Wheatly-bridge 5, Tetſworth 5, Stoken-church 5, Wickham 5, Beconsfield 5, Uxbridge 7, London 15.

From Oxford *to Coventry* 44 *miles.*

First to Woodſtock 6, Banbury 14, Southam 10, Coventry 14.

From Oxford *to* Briſtol 49 *miles.*

First to Faringdon 13, Ciceter 14, Sudbury 12, Briſtol 10.

From Shrewsbury *to* Coventry, *and ſo to London,* 118 *miles.*

First to Warlingſtreet 7, Sharſhal 5, Bonigal-Wolverhampton 5, Bremicham 10, Metiden 10, Coventry 4, and ſo to London as in Cockermouth way.

From Shrewsbury *to* Briſtol 70 *miles.*

First to Ludlow 20, Lemſter 8, Hereford 12, Monmouth 12, Auſter 10 Briſtol 8.

From Walſingham *to* London 86 *miles.*

First to Picknam 12, Brandon-ferry 10, New-market 10, Whitford-bridge 12, and ſo to London as in Norwich way.

From York *to* London 151 *miles.*

First to Tadcaſter 8, Wentbridge 13, and ſo to London as in Barwick way.

From Yarmouth *to* Colcheſter, *and ſo to* London 104 *miles.*

First to Leſtaff 6, Blibur 10, Snapbridge 8, Woodbridge 16, Ipſwich 9, Colcheſter 12, Kelnodon 8, Chelmsford 10, Hogerſton 5, Brentwood 5, Rumford 5, London 10.

From Rye *to* London 61 *miles.*

First to Pimwell 15, Tunbridge 12, Chepſtow 17, London 17.

Of

Of the Eclipses this Year 1684.

THere will be five Eclipses this Year, three of the Sun, and two of the Moon.

The first is of the Sun the 6 day of *January*, about half an hour past 5 at night, and therefore inconspicuous to us, the Sun being set, but twill appear a great Eclipse to those that inhabit near the Æquator, and in the *West Indies*.

The second is a small Eclipse of the Moon, *June* 17 about 36 min. past 2 *manè*, and visible to us if the Air be clear, but there will be not above one ninth part of her body darkned.

The third is an Eclipse of the Sun *July* 2, at 2 h. 38'. 20" *p. m.* This Eclipse will appear very great to the Inhabitants of *Russia, Bohemia, Austria, France, Spain, Hungary*, and in the Latitude of 46 degr. and Longitude 35 degr. westward from *London*, the Sun will appear Centrally Eclipsed in the Nonogesima or 90th degree.

The greatest Obscuration	3 h	10'	8"	*p. m.*
The beginning at	2	8	14	
The end at	4	17	20	
The total duration	2	13	50	

Digits Eclipsed 7. 38' 42".

The fourth Eclipse of the Moon *Decemb.* 11 about 50' past 10 at night, total duration 3 h 18'. 4". The greatest Obscuration 10 h 46" 15". *p. m.* Beginning at 9 h 12. 6". The end at 12 h 22'. 15". *p. m.* Digits Eclipsed 8. 49' 0".

The fifth Eclipse of the Sun *Decemb.* the 26 about 42' past 4 *manè*, and therefore to us invisible, but may be seen by our *Antipodes*, and it will appear a great Eclipse to those that inhabit near the *Antartick Circle*, but in the Lat. of 78 deg. South, and about 15 deg. eastward in Long. from our Metropolis, the Sun may be seen Centrally Eclipsed in the 90 degr. of the Ecliptick: but of the Effects of Eclipses I must refer you to such Annually Writers that take pains therein, and have more room to breath in, and exhibit their Conjectural Judgements of these matters.

Culpepper 1684.

THe Spring Quarter this year begins according to the *Rudolphin* Tables, *March* the 9th, at 2h 30′ *post. mer.* but by the *Caroline Tables* at 4h 47′ 48″ *p. m.* as appears by this Calculation (and later yet, by the Authors new Tables)

The Calculation follows.	S.	d.	m.	″
Longit. of the Sun from the Æquinox	00	00	00	00
The Præcession of the Æquinox subtract	00	28	42	33
Longit. of the Sun from the first Star of ♈	11	01	17	27

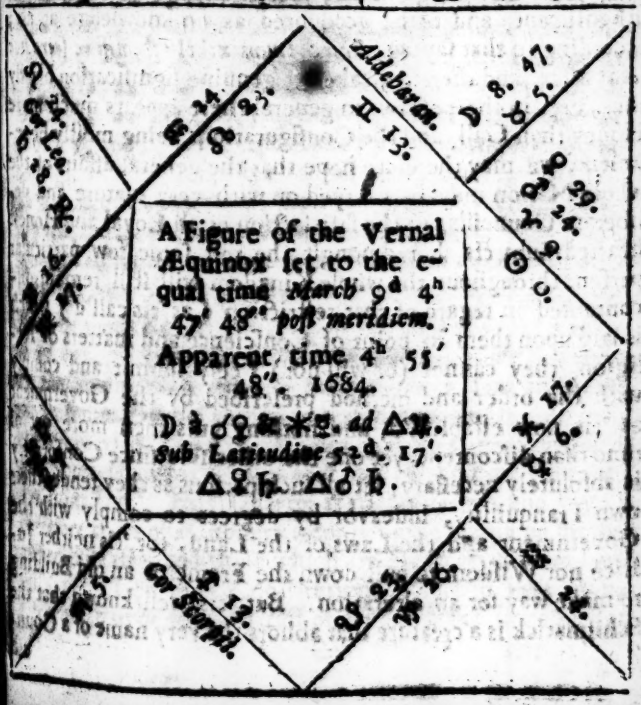
Remainder 2 sec. which answers to 48″	00	00	00	02



Brief Observations upon the aforegoing Scheme.

THe two Superiors ♄ & ♃, (after their late famous triple Conjunction) are now separated at least half a sign, ♄ is with the *Scorpions heart retrograde*, but (befriended or) assisted by the Trigonal Rays of ♂ and ☿; ♃ is near the Ascendant in his Detriment, but the potent ☽ casts her benevolent △ to his body, and ☿ his ☍ with reception; and thus stands the position of the Heavens. Here note, that I regard the Configuration of the Planets principally, more than the Houses or parts of Heaven, and therefore the difference in the Ascendants of the Figure of the Sun's ingress into any of the *four cardinal points*, from several Tables, will not in this method of Judicature be considerable, and the next thing to be enquired into is, what this position may portend naturally to us; for knowledge in any person unless communicated is insignificant, and to be accounted as no knowledge at all; according to that saying, *Scire tuum nihil est, nisi te scire hoc sciat alter*, and therefore take the genuine signification briefly thus, *viz.* in the position in general there appears much more Honey than Gall, and the Configurations being mostly benevolent, we may therefore hope that the general affairs of the whole Nation may be carryed on with very mature and deliberate Councills, to the satisfaction of all Loyal and Honest hearted Subjects, but amongst the rest some few particular persons throughout the whole Kingdom will still remain discontented in regard of that restriction (as 'tis call'd) which is laid upon them in point of Conscience and matters of Religion, they cannot (or will not) freely submit and comply with the order and method prescribed by the Government as 'tis now establish'd, and nothing puts men more out of tune than discontent, yet one the other side since Conformity is absolutely necessary, let all such persons as they tender their own Tranquillity, indeavor by degrees to comply with the Government and the Laws of the Land, for 'tis neither Justice nor Wisdom to pull down the Frame of an old Building to make way for an alteration. But 'tis well known that the Schismatick is a creature that abhors the very name of a Council

cil or a Synod. The Sectary cannot endure the weight of an obligation to any Law, for he thinks himself advanc'd to an higher degree of Glory, than weakly to submit to the Tuition of an external Government, he hath found out a neater way to Heaven, than by following the Doctrine of the *Catholick Church*. As for Diseases here's no eminent danger from the Scheme, and yet ♀ is not out of the Orbs of ♄, and the ☽ hastens to his ☍ Aspect, whence we cannot expect to be totally free; but that which imports violent and dangerous Diseases, (or at least is the Sign though not the cause) thereof both to us and other Nations, (or the real Harbingers of such Calamities) we have intimated in our last Years Almanack, viz. the late Conjunctions of the Superiors, and the two last Comets; of the Effects of which, much has been already written, and perhaps more than was necessary, and therefore needs no repetition in this place, since the whole Nation (or the most part thereof) I mean those persons that are curious cannot be ignorant of the same. Lastly here is great hopes that Providence may so order it, that at least for this Year, we may happily enjoy both Peace and Plenty, with moderate seasonable weather, as you may see in the Kalander-part; and for any thing dangerous that may accidentally break out amongst us, let us resolve to endeavor to compose, so far as we are able, and patiently bear the greatest change that can happen, since 'tis impossible to avoid them. But our own thoughts oftentimes are the onely mould in which we cast the model of our Happiness, and thus much upon the year in general.

Of the Summer.

THe Summer Quarter begins this Year *June* the 10th, 5 minutes past 5 afternoon, at which time the Sun touches the Tropical Sign *Cancer*, & thereby makes the Longest days and Shortest nights unto us that live on the North side of the *Equinoctial*. This Quarter is naturally hot and dry, and therefore those of a Cholerick constitution should be most subject to Diseases, and those which are Flegmatick more healthful; yet all or most Constitutions may this very Summer (which is to be feared) taste of the Effects of some Epidemi-

cal Disease which may probably afflict the Inhabitants of many or most Counties in *England*, and some adjacent Kingdoms and Countries, *Fiat Dei voluntas*. This Quarter, to preserve Health, eat such meats as are easily digested, and rather rise with an appetite then over-charge the Stomach; for it is now more weak than in the Winter Quarter, and therefore slower of digestion, and requires such cold meats which may moisten and mitigate the nature of the season. *Pulvis & umbra sumus.*

Of Autumn.

THe *Autumnal Æquinox* or Harvest Quarter begins when the Sun toucheth the first point of *Libra*, which this Year falls upon *Septemb.* the 12th, 25 min. past 8 in the morning, and then the Days and Nights are equal all over the World, (except under the Poles) This season is naturally cold and dry, and therefore those of a Sanguine Complexion should enjoy their health well, and the Melancholly Constitution most subject to diseases. Now you may eat what meat or fruit your Appetite desires, and 'tis also good to Purge and Bleed, and in your Broaths use Cordial powders, which will preserve the Body till the ensuing Spring. *Non nobis nati sumus.*

Of Winter.

THe Winter Quarter or *Solstice* begins always when the Sun having finished his greatest Southern Declination, makes his approach to us again; and at the same time makes the greatest quantity of Shadow, and least portion of Sun-shine unto us, (as the contrary in all respects when he touches the Opposite or Northern Tropick) so that now the Sun touches the first scruple of *Capricorn* the days are shortest and the nights the longest with us, and this Quarter commences *December* the 10, 27 min. past 8 at night. The natural temperature of this Quarter is cold and moist, and therefore aged Phlegmatick Constitutions are most subject to distempers, and Youth and Chollerick persons enjoy their health best. In *December* Melancholly and Phlegm much abound and encrease in Humane bodies, therefore let all Persons be

care-

careful to keep their heads and bodies as secure from cold as may be, and eat such Broaths or Meats that are of a hot quality, for whilst there is life there is hopes we may many of us live to a considerable Age, but to some Persons the thoughts of Death is as terrible as Death it self.

Mors ultima linea rerum.

And to this may be added this common Phrase, *cum Mors opitur, cum nullus amicus habetur.* When a man has no friend left to assist or support him 'tis time to wish for death, and at best Man is but a Passenger in this Life and the World his Inn, till sickness brings up the reckoning, and death comes in with an All is paid.

An Account of the Planets Rising, Southing, and Setting this Year, of good use not onely to know them, but to find the Hour of the night.

January. ♄ at the beginning of the month rises between 6 & 7 at night, and is south between 2 & 3 *mane*, ♃ at the beginning rises about 9 at night and is south about an hour after ♄, ♂ sets at 7 at night, ♀ follows ☉ for company, & ☿ at the end of the month emerges out of the Sun beams.

February. ♄ at the beginning hereof is south about midnight, & ♃ at the same time rises at 7 *p. m.* and is south at 1 in the morn. but towards the end he is south about midnight, ♂ & ♀ keep court together and set after ☉, ☿ may be seen at the begin. hereof, but falls under the Sun beams at the end.

March. ♄ at the beginning hereof may be seen upon the meridian presently after 10 at night, but at the *end* he souths about 9, and sets about 5 in the morning. ♃ souths about an hour after ♄, ♂ & ♀ move lovingly together, and set immediately after ☉. ☿ rises about an hour before ☉.

April. ♄ at the beginning souths about 8 at night, but at the end before 7. ♃ touches the meridian an hour after ♄. ♂ & ♀ keep court with (and attend) Royal *Sol*, but towards the end draws somewhat nearer him, and therefore will not be seen, ☿ rises before ☉ but cannot be observ'd this month.

May. ♄ this month sets about 1 in the morning, and ♃ about an hour after, ♂ is hid by the Sun beams and cannot

be

be seen. ☿ follows ☉, but sets not till almost midnight, ♀ follows ☉ and at the end of the month may be seen.

June. ♄ sets about 11 a night, and ♃ sets an hour after, ♂ still continues hid under the Sun beams, ☿ follows ☉, & towards the end of the month sets with ♄, and ♀ follows ☉ and at the end is obscured by his beams from our sight.

July. ♄ now follows ☉ but sets not till about 10 a night, and ♃ & ☿ follow ☉ & ♄ also, and at the end of the month draw near together. ♂ & ♀ rise before ☉, and may be seen if the air be clear about the months end.

August. ♄ falls under the Sun beams, ♃ follows ☉ and may be seen in the evening, ♂ rises before ☉. ☿ & ♀ this month fall under the Sun beams, and therefore we cannot expect to see them.

September. Now ♄ gets out of the beams of ☉, and may be seen towards the end hereof in the morning. But ♃ falls under the Sun beams, ♂ & ☿ rise before ☉, ♀ hastens out of the Sun beams, and therefore may be seen in the evening.

October. Now you may observe ♄, ♂, & ☿ to rise before ☉, and are near together about 3 in the morning the first half hereof, ♃ emerges out of the Sun beams and may be visible in the morning, but ♀ is obscur'd from our sight by the beams of the Sun.

November. ♄ at the beginning rises about 1 in the morning, but at the end rises before midnight. ♃ & ☿ about the midst of the month rise almost together between 5 & 6, ♂ appears just before them, and ♀ rises near 2 hours before the Sun.

December. ♄ rises near 11 at night and souths about 5 in the morning, ♃ & ☿ keep near together and rise about the first half hereof, ♀ being our glorious and bright morning Star, rises at least an hour before break of day, and ♂ is now hid under the Sun beams and cannot be seen.

Excellent Notes of Husbandry and Gardening for each Month in the Year.

January.

In this Month cut down Timber and it shall not cleave nor be eaten with Worms: in the last quarter of the Moon sow Kernels and Bay-trees, Primet and Fox; set Quick-sets, Roses, trees, Peaches, Philberts & Plumb-trees, if the frosts be not too hard, prune and lop them: before full Moon sow and set Beans and Peafe, and dung Land: in the last quarter geld Cattle to rear, fallow Land for Wheat and Rye, trench Gardens with dung, and remove Bees: and for your own health keep your body warm, let good and wholsom Diet be your Physician, moderate exercise and labor your sawce to cause Appetite.

February.

Sow all sorts of Peafe, and other Pulse; sow Mustard-seed, cast up Dikes, set & plant Vines, Hops, Goosberries, and any Fruit that grows upon Bushes; prune and trim all sorts of Fruit-trees from Moss, Canker, and all superfluous branches, graff in the latter end of the Month, sow Onions in cold stiff Land, take heed of cold, forbear Phlegmatick meats.

March.

In the new of the Moon (the wind any way but South or West) graft Pears, Wardens or Apple-trees, make an end of sowing all manner of Pulse, and begin to sow Oates, Barly, Parsnips, Onions, Carrots, Cucumbers, Melons, and all kind of Pot-herbs, set Artichoaks and Sage, geld Lambs, let Blood according to strength and necessity, the Sign and weather being also fit (our repair to the learned Physician) look what cannot be cured in the Spring by Physick, will hardly be cured all the Year after.

April.

Sow Barly, Hemp and Flax, Pole Hops, set and sow all kind of Garden Herbs, open Hives, and let Bees labour for their living, let Tanners now provide them with Bark, and all good Housewives look to their Dairies, bleed and purge with advice: those that are troubled with Aches or the Gout, let them go to the Bath in this or the three following Months.

May.

Sow Barly on all light Lands and bearing Grounds, and Hemp and Flax, and all manner of fine Seeds and Herbs, take Lambs from their Dambs, fur Land for Wheat and Rye, leave lopping of Trees, teach Hops to climb, but cut off the superfluous Branches, rise early, walk the fields, especially by running Streams: Sage and Sweet Butter is now an excellent Break-fast; Sage and clarified Whey, as also Scurvy Grass Ale, and Wormwood Beer, are wholsom Drinks to be drunk fasting.

June.

Sheer Sheep, bring home Fewel, weed Corn and Gardens, set Rosemary, Carnations and Gilly-flowers, sow Lettice and Radish-seed three or four days after the Full, for then they will not run to seed, make Hay, carry Sand, Lime, Marle and manure of what kind soever, repairing your Land, cut neither Hedge nor Tree in this and the two

next

ceed Months, beware of great thirst, use thin and light Diet, moderate exercise, and chaste thoughts.

July.

Make your Hay and house it while it's fair weather, pull Hemp that is ripe, gather Garden Beans, get Rue and Wormwood, and Gall to strew on your Floors, to destroy Moths and Fleas, fence your Copses, use moderate Diet, take heed of great thirst, for nothing bringeth the Pestilence or pestilent Diseases sooner than extream thirst, and fervent heats, and cold taken suddenly upon them, take no Physick, bleed not but upon violent occasions.

August.

Follow close your Corn Harvest, sow winter herbs in the new of the Moon, gather Garden-seeds, mow Barly and Oats, gather your Summer-fruits, refrain from sleeping in the day time after Meat, avoid riot and excess.

September.

In the beginning of this Month and end of the former, gather Hops when they wax brown, the weather being fair and no dew on the ground, kill Bees, make Verjuice, sow Wheat and Rye, remove and set all slips of Flowers between the two *Lady days*, put Swine to mast; remove Trees every new Moon from *September* till *February*, especially in the new of the Moon, the weather fair and warm, wind South or West, use Physick moderately, forbear Fruits too pleasant or cooling, shun not and excess of Diet.

October.

Sow Wheat and Rye, the sooner the better, for fear of rain, set Acorns and Nuts, gather winter Fruit, the weather dry, in the afternoon, and in the wain of the Moon, cut Rose-trees if you desire to have store of Roses, do this once in two years, refuse not any needful Physick at the hands of the Learned, and use all moderate Sports to cherish the vital Spirits.

November.

Make Mal, kill Hogs, trench Gardens with dung, set Crabb trees, stocks, sow Wheat and Rye in exceeding hot sandy Grounds, cut down Timber for Plows, Carts, and other Implements for Husbandry, use wholsome Meat and Drink, with good exercise to preserve health.

December.

In this and the next Month cut down Timber, in the last quarter of the Moon uncover the Roots of Fruit-trees: set Beans and Peas, cover all the best Flowers and Herbs from Frosts and Storms with old rotten Horse-dung, look well to your Cattle, water and keep moist your Meadows, let Horses bloud, and drink good Wine and Strong Drink, keep thy Body warm clad, thy House warm and dry, cast all care from you, and relieve those that are in want with thy Charity: Thus have I ended these Observations which are laid down for thy advantage, make good use of them, and give God the Glory.

FINIS.
